

Technical Features

1DocStop is a secure, low-cost, and highly functional document management solution ideal for organizations looking to streamline record scanning and delivery. This feature rich XML based solution is built on leading Microsoft .NET framework and affords the benefits of a forward thinking approach to records management.

- ✓ Utilizes existing scanner/copier equipment
- ✓ Store nearly unlimited file formats and sizes
- ✓ Easily incorporate both electronic records and imaged documents
- ✓ Access records virtually anywhere with internet access
- ✓ Thin client application: no need to install non-standard ActiveX controls
- ✓ Ability to print, email, and comment on any document
- ✓ Full auditing capabilities: know who accessed what record, and when
- ✓ Secure authentication via username and password
- ✓ All https connections are secured with 128-Bit SSL certificates

Store your vital records and transmit information without the hassle of disorganized paper documents—no more searching, mailing, or filing. With 1DocStop, you can increase efficiency of information retrieval and utilization, and allow staff to focus on productivity.
